SKILLS & ABILITIES

Technical: SQL | Python | Tableau | Excel (VLOOKUP, INDEX MATCH, PIVOT TABLES) | SharePoint | Business Objects | Microsoft SQL Server | Visual Studio Code | HTML | CSS | JavaScript

Other Skills: Attention to Detail | Time Management | Adaptability | Critical Thinking | Collaboration | Presenting

PROJECTS

Netflix Dashboard | Excel, Tableau | ([Link](#))

→ Analyzed a dataset of 8,807 rows containing movie and TV show information from various directors spanning two years.

→ Generated eight distinct charts based on different criteria such as category type, year of release, cast, director, statistics, country, and rating. These charts aided in determining the shows with the highest number of shows per cast members, directors, and categories, as well as the annual production count.

→ International movies surpassed dramas with a count of 1,927 compared to 1,623, while the United States took the lead with a total of 176,031 minutes.

→ TV-MA (mature content) rating showed a higher prevalence with 2,014 instances, as opposed to TV-14 (unsuitable for viewers under 14 years old) with 1,693 occurrences.

Bike Sales Dashboard | Excel: Charts, Slicer, Pivot Tables | ([Link](#))

→ Performed data cleansing and review, eliminating duplicate entries, updating column descriptions and cells, and removing irrelevant data.

→ Generated reports on bike sales based on average income, commuting distance categorized by mileage ranges, education level per rider, and age brackets per rider.

→ Developed a user-friendly slider for effortless data manipulation, ensuring easy accessibility and frequent updates for business purposes.

Rock, Paper, Scissor game | Python | ([Link](#))

→ Developed a Python game that can be played by a single player, incorporating user input.

→ Provided a set of instructions, allowed the player to choose their character, determined the sequence of plays, identified the winner and loser, and offered the choice to play again.

→ Utilized the random.choice function to generate the computer's choice in the game.

Tennis Stats Data Exploration | SQL | ([Link](#))

→ Employed a range of SQL queries to retrieve relevant data from the database.

→ Utilized MySQL Workbench as the primary tool for executing these queries.

EXPERIENCE

U.S. Air Force Reserves

Flight Chief | March 2004 – Present

→ Assisted in the design and development of SharePoint master pages, incorporating content and strategic plans to accommodate future expansion.

→ Created and managed organizational charts and reports in Excel, establishing them as standard references within the unit for comprehensive information.

Truckstop.com

Accountant | January 2022 – March 2023

→ Developed an Excel report that employed a range of functions, including VLOOKUP, SUMIFS, INDEX MATCH, GEOGRAPHY, COUNTIF, and PIVOT TABLES, to validate Zuora data against Salesforce data.

City of Austin

Accountant | October 2020 – May 2021

→ Crafted SQL queries to retrieve data from multiple tables, extracting relevant information for business use and various departments.

→ Assisted in calculating and monitoring Key Performance Indicators (KPIs) for the Service Center.

HCA – St. David's Healthcare

Accountant | April 2015 – May 2017

→ Engaged in daily data gathering from external sources, consolidating information obtained from business object reporting systems to generate operational reports on a daily basis. These reports were subsequently shared with the Controller.
